

Island Island

Come on boy lets spend some time

You and I on an Island

found this island claimed it mines,requested asylum

Baby this is what I want

Baby give me what I want

Tell you baby this is really what I want

Tell you baby that you need to come along

As the sun starts to shine

we enjoy the silence

Feel my baby from behind

peaceful no violence

Here I have you all for me

On my island we are free

Be who the hell we want to be

Come with me and you will see

Rap

Think about all the things you have been telling me

That you cannot live without everyday seeing me

But when I am with you your only there physically

My islands a fantasy come with me and you will see

Lets hit the island start living our dream

A little seclusion is just what we need

Just come along and show me some trust

Open your heart and I'll fill it up

Rap II

Feeling you, holding you, smelling you, touching you, wanting you, what
you'll never be having to leave a me, cause this a fantasy what
